Hand dryers for every purpose

- even when time is a decisive factor!

Quality, design and speed! The best words to describe the **Turbo** hand dryer from DAN DRYER. Featuring a drying cycle of only 10-15 seconds, 5-year warranty and space-saving, elegant cylindrical design, Turbo is extremely popular and one of the best-selling DAN DRYER hand dryers.

Turbo's strength and reliability have made it a standard in public toilets all over the world. And even after more than 30 years in the industry, development is still top priority at DAN DRYER to stay at the leading edge.

Innovation combined with our tried and tested quality has resulted in yet another robust, reliable high-speed dryer with a shape reminiscent of a beautiful, strong, straight and typically Scandinavian tree. Hence the name derived from the Scandinavian word for birch, namely: **Björk!**

Björk is based on the principles of Turbo, featuring the same technical details, but with a quite unique and innovative look. The cylindrical shape with unbroken lines makes Björk seem slender and almost weightless. - A design so convincing and original that it has received the prestigious and coveted

Red Dot design award!

The timeless, flexible high-speed hand dryer provides a high degree of individual freedom of design. Björk's interchangeable top plate facilitates styling and customising to any colour scheme or visual identity, blending beautifully with any interior design.

Björk is durable design, and in common with Turbo, was developed with recycling and respect for the environment in mind. Sustainability at its finest!

Why specify DAN DRYER hand dryers?

- **One of the widest ranges on the market**
- **A complete range of top-quality hygiene products**
- **Focus on quality, design and usability**
- **More than 30 years' experience**
- **Professional advice and knowledge-sharing**

HYGIENIC

Easy maintenance of a clean environment. That is why all DAN DRYER products are designed with clean lines and no awkward inaccessible corners.

ECONOMIC

Durability and quality to avoid frequent reinvestment and reduce operating costs. Try out our savings calculator on www.dandryer.com and see how much you can save e.g. with a DAN DRYER hand dryer.

RELIABLE

Quality is the core of DAN DRYER and as a result we can offer exceptionally stable and durable equipment that is easy to maintain at all times.

ENVIRONMENT-FRIENDLY

Products from DAN DRYER produce virtually no waste other than the packaging they are delivered in. Functional solutions ensure optimal use of consumer products and low power consumption.

TIMELESS

DAN DRYER is known for its simple and timeless design able to fit into any environment with respect for architecture and interior design.

DAN DRYER hand dryers all over the world renowned for quality and wide product range

From classic to advanced high-speed hand dryers. DAN DRYER's effective and hygienic range is one of the widest on the market, offering models to fit every purpose and in every price category.

Quality and design are key elements when selecting hand dryers for public toilets. And yet another factor is of growing importance – namely *time*.

To most people, time is more valuable than ever. A tendency that is also reflected within hygiene, where fast and effective hand drying is given high priority by users of public toilets.

The demand is there and growing, and is why DAN DRYER is a popular worldwide supplier of high-speed dryers for all types of public toilets, e.g. in lay-bys, restaurants, hotels, schools, shopping malls and office buildings.

Typical locations for DAN DRYER hand dryers:

- Airports
- Public buildings
- Educational institutions
- Shopping malls
- Supermarkets
- Offices and administration
- Hotels
- Restaurants
- Cultural centres
- Event and sports arenas

Björk

reddot award 2015
winner

More than 30 years' experience within equipment for public toilets

Supplier - Advisory Service - Product Development

DAN DRYER was one of the very first hand dryer manufacturers on the market, and has gone on to establish a leading position as supplier of toilet equipment. The Viking logo is easily recognisable in public toilets all over the world. Many years' experience has led to the company becoming specialists within development and production of toilet equipment. We now offer our customers a wide range of products, right from hand dryers to complete hygiene solutions.

DAN DRYER is a solution-oriented company, developing products according to market needs, an approach that results in close dialogue-based cooperation with our customers, as we do not consider ourselves merely a supplier. We are also the ideal consultant and partner for discussion - always prepared to do more for our customers and to join product development projects.

With this approach, DAN DRYER has positioned itself internationally as one of the most preferred suppliers of toilet equipment, e.g. to airports, public institutions and retail chains, and we have earned a unique position as a niche manufacturer of technically complex and customised products to the rail industry.

Our strength lies in unique know-how and a company structure that enables us to respond quickly and flexibly to individual requirements and specifications. Whatever part of the process - from project stage to the finished building - we can always help find the right hygiene solution.
