
PRODUCT DESCRIPTION

DAN DRYER® ELEGANCE DISPENSER FOR FLUID SOAP / DISINFECTANT

The DAN DRYER ELEGANCE dispenser doses, when hands are held underneath the dispenser.

For re-fill of soap/disinfectant, the front of the housing is opened, and the container may easily be rinsed out prior to re-fill. Soap/disinfectant is carefully funnelled into the transparent container.

DAN DRYER® ELEGANCE DISPENSERS:

DAN DRYER® ELEGANCE dispensers for disinfectant and fluid soap respectively are manufactured in impact-resistant plastics and boast a classic, easy-to-clean design. A small pane makes it easy to check whether or not the dispenser needs re-filling.

For re-fill, the dispenser housing is opened by means of the special key supplied. The transparent container and the dosing nozzle may easily be removed and rinsed clean prior to re-fill. The container holds 1.1 l fluid soap/disinfectant.

The DAN DRYER® ELEGANCE dispensers are touch-free for maximum hygiene. The dispensers are battery-operated and run on 4 pcs. AA-LR6 1.5 V batteries. When the front of the housing is closed, the dispenser is automatically operable. When the housing is opened, the dosage mechanism is deactivated to prevent soap/disinfectant from dripping onto the floor.

For dosage, simply hold hands underneath the dispenser. The dispenser will dose when hands are held between 1-8 cm underneath the nozzle. One dosage is 1 ml.

DIMENSIONS:

H: 235 mm W: 140 mm D: 115 mm

INSTALLATION HEIGHT:

Approx. 30 cm above sink/tabletop or the like.
