Quantity for pallet

This number indicates how many units of this item are needed to fill the 2 types of pallets employed for shipments

Product icons

These icons represent symbolically the Product Specifications (Rif. back cover strip)

Opening tap hole

To order the washbasin with the tap hole open, you should add the number "1" before the color variant, for example:

B6R811BI white washbasin with 1 tap hole

B6R811XX Bagno di Colore washbasin with 1 tap hole

B6R811XX Le Pietre washbasin with 1 tap hole

The cost for opening of each tap hole is € 25 (for example the cost of the sink SCQ611BI = SCQ61BI + 25 €)

For the washbasins for which there is the predisposition to the opening of 3 tap holes, the code to be used to request the product will be SCQ613BI and will be charged the opening cost of 3 holes which is € 75 (for example the cost of the sink SCQ613BI = SCQ61BI + € 75).

Quality and environmental certifications (ISO 9001 - ISO14001)

Declarations of conformity of products to the applicable laws. This section includes LEED declarations.

Declaration of Performance of the product (DOP), which is mandatory and requested for tenders or projects by building companies and architecture studios.

BIM files for products

We reduced the water waste

Globo Water Saving is a new flush system that considerably decreases the water consumption with a drain lower than 3 Lt on average. Ceramica Globo's commitment to water conservation has driven it to design more and more efficient products and systems, created using eco-friendly production processes that have a low impact on the environment. Globo Water Saving is present in all the sanitary ware of the most recent collection, where the size and shape of the siphon duct has been optimised to improve flushing efficiency, in combination with the company's toilet cisterns

Traditional drain

GLOBO drain

Less than 3 Lt. needed

Antibacterial treatment on seats

The antibacterial resin is treated with a specific antimicrobial additive that drastically reduces the presence of germs and bacteria on the seats, keeping the surface intact and shiny for a long period of time.

CERASLIDE®

New ceramic glaze

Benefits

Resistant to stains and abrasions

Deeper hygiene

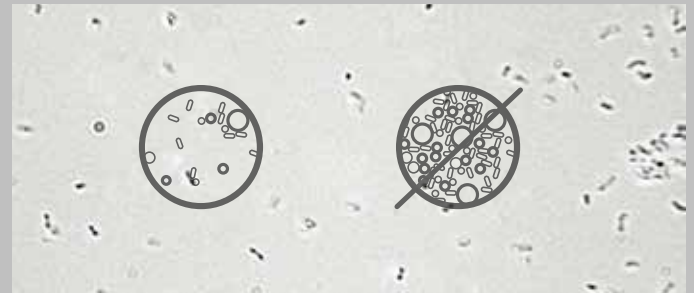

Brighter and more uniform colour

The careful control of temperatures in the various cooking stages, in a cycle that can last up to 26 hours, ensures perfect homogeneity of the product during the sintering process, reducing porosity and guaranteeing greater resistance against stains, dirt and abrasions. This means the residuals do not adhere to the walls but slide off with the water.

BATAFORM®

Antibacterial treatment

The BATAFORM® antibacterial treatment was developed to ensure deeper hygiene. The antimicrobial power of this process during production significantly reduces the presence of germs and bacteria. Laboratory tests performed according to the international ISO 22196:2011 standards confirm a drastic decline in the presence of microbes.

Firing temperature of 1250 °C

Firing cycle of 26 hours

Smooth ceramic surface

* The CERASLIDE® glaze and BATAFORM® treatment are not applied on items in ceramic colors (**Bagno di colore**)

The CERASLIDE® glaze in combination with the BATAFORM® antibacterial treatment gives sanitary fixtures greater gloss, resistance and hygiene for maximum comfort and wellbeing in the bathroom.

GLOBOTHIN®

It is a new and exclusive ceramic mixture that allows to produce wash basins with only 6 mm thin edges, without affecting the product stability and geometry.

After years of continuous and arduous research, the laboratory of Ceramica Globo has invented a new patented mixture named GLOBOTHIN® which enables to reduce the edge thickness, on the one hand, while providing brighter gloss and greater resistance, on the other hand.

There are several and remarkable advantages: less raw materials employed and therefore lighter products, less energy required, and greater ductility which makes creating new shapes possible.

Tests conducted by certified laboratories have given, according to the law UNI 4543, excellent results as far as water absorption and mechanical resistance are concerned. This ensures a brighter gloss of the glaze and determines an improvement of about 38% more than the minimum threshold provided for by law.

This new technology had a dramatic impact on the design of new shapes: new horizons open up and Ceramica Globo is willing and ready to explore them by creating increasingly cutting-edge and performing products.

GLOBOTHIN® has shown innovative features already in the first months and it will surely have further developments which are bound to confirm, once again, that our company ranks among the market leaders.

Bagno di Colore

The research undertaken by Globo in recent years has led to the conception of new ceramic colours. Colour is a vital part of our life and home. For this reason, Globo experiments with new bathroom proposals, becoming a reference and source of inspiration for architects and designers.

The articles of the collection "Bagno di Colore" don't have an industrial production, but they are treated as special products. In fact the colored oxides are grinded in special mills to achieve unique shades, that is why any possible chromatic imperfections are due to the craftsmanship of the product, making it unique.

Drains for basins and bidet not included

Drain chrome finish

Drain Up & Down cod. FI012CR € 38,00

Free fflow drain cod. FI024CR € 29,00

Drain ceramic color

Drain Up & Down cod. FI012 + Glossy white colour FI012BI € 71,00

Cisterns flush and plates

All Globo pans, created in accordance to EN 997:2012 norm, can be matched with the new cisterns flush and plates shown on page 159 ; in addition, they can be matched with GEBERIT products which use the codes UP200-UP320-UP720 created pursuant to EN 14055:2010 norm.

Wc 's washing and water flow reductor

Some of the Globo pans (that are mentioned in the price list) in case of installation with other flushing cisterns, instead of the models mentioned above, for the normal working of the wc, it is suggested to buy the flow reductor Cod VA132.

Brand new items

New items are marked with the word **NEW!!**. If not specified on availability date, items are currently in supply.

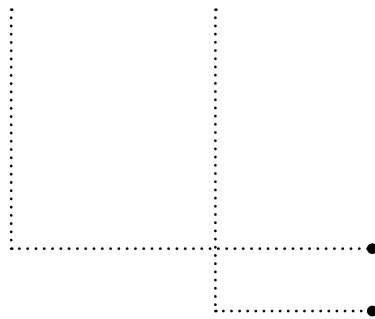

All washbasins can be combined with mirrors on page 127

Technical information about Paestum furnishings

Material composition

Oak-finished furniture: the oak-finished furnishings in this range are made of solid ash wood.

Lacquered and foil-finished furniture: the lacquered and foil-finished furnishings in this collection are made of HYDRO MDF.

Lacquered mirrors: the 4mm thick mirror is cut and its edges are beveled; the frame is made of high-density expanded polyurethane.

Foil-finished mirrors: the 4mm thick mirror is cut and its edges are beveled; the frame is made of solid wood and coated with a silver or gold foil.

Oak-finished mirror: The 4mm thick mirror is cut and its edges are beveled; the frame is made of solid wood.

Antique-looking metal structures: They are made of brass-plated metal which is subsequently painted to obtain the antique look.

Chromed structures: They are made in brass which is subsequently chrome-plated.

Cleaning mode

All the above mentioned products must be cleaned by following the instructions here below:

Use a soft, slightly damp cloth. Avoid using grinding detergents or products that contain acetone, ammonia or solvents, furniture creams or waxes, alcohol or products for cleaning mirrors. We recommend that you also clean the mirror only with a damp cloth to prevent damage to the frame.

Please note: The first few times that you wipe the lacquered surfaces, these may release some color on the cloth; it is not a product flaw, but a coat of glaze that results from the painting residuals. It will be removed after the first wipes and will therefore vanish.

The colour tones are indicative, as they may change in relation to the printing method of the catalogue.

Colors and finishings of the Wood furnitures

Washbasin shelves

Building materials

The material of the shelves is a wood veneered panel in hydrophobic chipboard V100, formaldehyde emission in Class E1. This material provides great resistance to abrasion and an excellent durability in time.

Cleaning mode

Use neutral liquid detergents for cleaning, do not use abrasive acids, products or powders that could affect the surface shininess.

Building materials

The material of the doors and the framework is a wood veneered panel in hydrophobic chipboard V100, formaldehyde emission in Class E1.

Cleaning mode laminate DELIZIA

Use neutral liquid detergents for cleaning, do not use abrasive acids, products or powders that could affect the surface shininess.

Cleaning mode Laquered

The lacquered surfaces, due to their finish, do particularly require a careful maintenance to prevent any damage of the surface. Use a soft, non-abrasive cloth for cleaning. Do not use products containing solvents, acetone or abrasives

Structures for bases, Wall cabinet

Color

Bianco opaco

Grigio opaco

Ruggine

Building materials

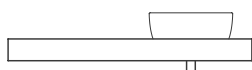

The structures are made of STAINLESS STEEL AISI 304 and then painted with powder coating

Cleaning mode

Use neutral liquid detergents for cleaning, do not use abrasive acids, products or powders that could affect the surface shininess.

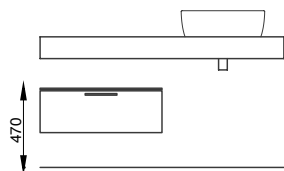

Technical information about the available compositions

Countertop installation

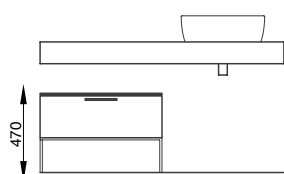

For this installation mode, you require the supporting rods art. no. FI038, which must be ordered by following the instructions contained in the dedicated order form on page 53. In this case, you can mount the lateral chromed napkin holder on both sides.

Countertop installation with distanced wall cabinet.

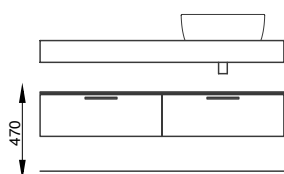

For this installation mode, you require the supporting rods art. no. FI038, which must be ordered by following the instructions contained in the dedicated order form on page 53. The upper side of the cabinet top must be at 470 mm from the ground. In this case, you can mount the lateral chrome napkin holder only on the side opposite to the cabinet.

Countertop installation with cabinet mounted on the structure

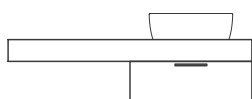

For this installation mode, you require the supporting rods art. no. FI038, which must be ordered by following the instructions contained in the dedicated order form on page 53. In this case, you can mount the lateral chromed napkin holder only on the side opposite to the cabinet.

Countertop installation with distanced wall cabinet below the washbasin.

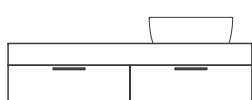

For this installation mode, you require the supporting rods art. no. FI038, which must be ordered by following the instructions contained in the dedicated order form on page 53. The upper side of the cabinet base must be at 470 mm from the ground to allow the correct installation and to leave enough room for the siphon when the cabinet is put under the wash basin. In such case, the lateral chromed napkin holder cannot be installed.

Countertop installation with washbasin base.

The articles no. FO105BI and FO090BI are not suitable for this composition set. For this installation mode, you require the supporting rods art. no. FI038 to be used only for the shelf side which is opposite to the cabinet. When assembling the cabinet and the wash basin, it is extremely important to carefully consider the center of the cabinet to make sure that the siphon has room enough to fit into the hollow space located in the drawer. In such case, the lateral chromed napkin holder can be installed only on the side opposite to the cabinet.

Countertop installation with washbasin base and wall cabinet.

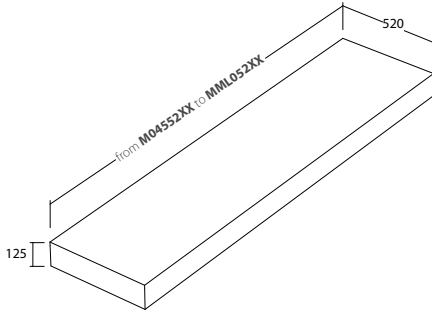

The articles no. FO105BI and FO090BI are not suitable for this composition set. For this installation mode, the supporting rods art. no. FI038 are not required because the shelf can be laid and mounted on the brackets below. When assembling the cabinet and the wash basin, it is extremely important to carefully consider the center of the cabinet to make sure that the siphon has room enough to fit into the hollow space located in the drawer. In this case the lateral chromed napkin holder cannot be installed.

Suitable for installing a tap that can be wall-mounted or built-in a shelf.

If you order the item FR003 (Tap hole on a shelf), the washbasin must be placed according to the measurements shown in the sample sheet here. If you do not order the item FR003 (Tap hole on a shelf), the washbasin must be placed at the center of the shelf so that it can fit properly with the wall tap.

Customized cut at building site

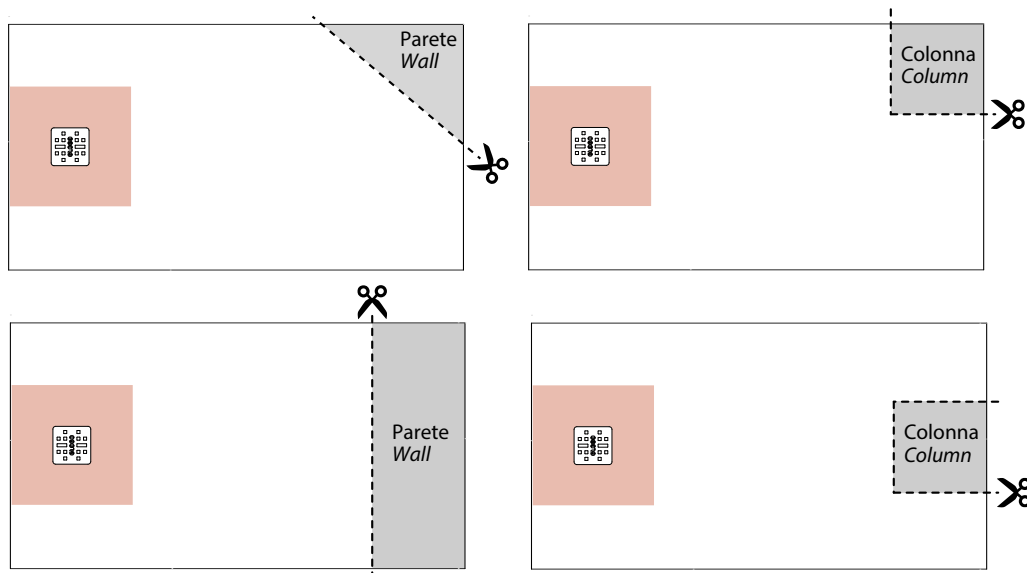

Ceramica Globo does not provide any diagonal cuts or pre-drilled holes, although the installer will be able to perform one by following the instructions below:

- Use diamond blades.
- First perform a pre-cut passage on the upper visible side of the shower tray without completely cut it down to the base. Then repeat the operation to actually cut the shower tray. In this way, you will avoid chipping the surface at the end of the cutting operation.
- The area where the drain is must remain uncut on a surface size of 40x40 cm where the drain is located in the middle of the square.

CUTTING EXAMPLES:

- 40 x 40 cm. - No cutting area

Ceramica Globo does not take any responsibility for the operations of cutting and installation of the shower tray

Slip resistance at an angle of 19 ° according DIN51097

Invisible Grip

WATERPASTE®

The secret of Docciatre is the new glaze. Applied evenly before cooking, it contains WATERPASTE® grip, a non-slip system developed and tested in the company's research laboratory, which guarantees a feeling of safety in the shower and meets all the requirements of the DIN51097 standard.

The grip system does not alter the shine and brightness of the shower tray in the Shiny White and coloured versions.

WATERPASTE® creates micro suction blisters (visible only under a microscope) on the vitrified surface of the enamel that, once wet and in contact with the feet, guarantee high slip resistance.

INVISIBLE GRIP
WATERPASTE®

The colours have been very carefully designed and, in addition to classic Shiny White, also include the new stone-effect finishes from the Le Pietre collection (chrome drain cover) and four elegant and warm ceramic colorurs from the "Bagno di Colore" range: Agata, a deep colour that expresses the changing shades of the depths of the earth, Perla, a touch of silky and pure "greige", Castagno, with its autumn-inspired nuances, and finally Matt White (matching drain cover).

GLOBO

Construction materials and guarantees

BOWL+, FORTY3, 4ALL, DAILY furnishings:
made of IDROPAN® and MDF.

IDROPAN

This is a coated and waterproof particleboard, therefore, it is highly resistant to water according to the standards set by UNI EN 120/92 with dilation degree of 6/8%, complying with the same standard on formaldehyde emission (Class E1).

The Idropan® board is not waterproof due to the glue used in the particle mixture.

In fact, the waterproof glue is green, whereas, if the glue has no colour, then we are looking at a non-waterproof board, which therefore is not resistant to water.

The Idropan® boards are environmentally friendly as they are made of particles coming from recycled materials, and are entirely made in Italy.

MDF (Medium-density fibreboard)

This is a derivative of wood and is the most common family of fibreboards. It is lacquered or veneered with sheets of melamine.

The board ensures absolute resistance to humidity complying with the standard on formaldehyde emission (Class E1).

MULTISTRATO

Category of semi-finished wood products, also called laminated boards. The boards are made of several layers of wood. Technically, plywood is the best material to make bathroom furniture because it is moisture resistant and lightweight.

Hook system of wall-hung furniture with unfasten safety

All wall-hung furniture are provided with a groundbreaking hook system, completely made of steel with reduced thickness (only 10 mm) which assures high resistance to heavy loads (up to 100 kg per corner of the furniture). The above-mentioned hook system is tested TÜV LGA according to the European regulations EN 14749, EN14688 and ISO 7170.

Through two screws, this hook system, enables both horizontal and vertical adjustments of 19mm and a vertical one of 22 mm, respectively.

The two anchoring plates are provided with an innovative and leading-edge anti-unfasten system which is activated automatically when the base holder is hooked into and prevents from any accidental detachment of the wall-hung furniture.

The hook of the base holder, entering in the hole of the plate, moves the steel flap. Then, going down to hook up the flap, the grapple goes back to the original position and prevents the hook from going up again and unfasten itself from the plate.

Soft-close opening and closing system of the drawer

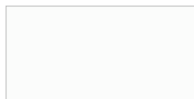

All furniture with pullout drawer are provided with soft-close system. This is possible thanks to high-quality tracks, certified for 40000 cycles of opening and closing according to the Regulation UNI 8604:2005 and resistance according to the regulation UNI 8605:2005.

Code composition

To order the furniture articles (base, high cabinet and cabinet mirror) it is necessary to indicate the product code followed by the code of the chosen finish.

Example: Base code FOM1Y (Wall-hung base) + Shiny White Ceramic Finish 001 = FOM1Y001

General conditions of sale

ORDERS

The acceptance of the order is always submitted to the approval of the supplier by giving his written confirmation to the buyer.

DELIVERY

Except for particular condition, goods are delivered ex factory and travel at buyer's risk even when they are delivered free port of destination. The order can be partially delivered. The cost of transport is at customer charge. Shipment are made on behalf of the buyer. In case of damages, breakages and shortages, the buyer has to notify to our firm through the carrier at the moment of the delivery. The supplier is the owner of the delivered goods up to the due payment. Terms of delivery are subject to variations and depending to the possibilities of the moment. Our firm is not responsible for any delay or missing deliveries caused by any facts independent of our will and any claim for reimbursement for any delay that may occur in delivery will not be accepted.

PAYMENT

Payment must be addressed to the supplier head. Any other form of payment is at complete buyer's risk. If payments are not made within the agreed expiring date, our firm has the right to stop the outstanding deliveries. Any delay in payment gives also the right to ask for the due interests at the current banking rate increased of two points.

PRICES

Prices can change at any moment and without notice. They can be replaced by the ones coming into force during the delivery of goods even if they refers to previous orders.

WEIHGTS, MEAUSURES, COLOURS

Technical dimensions, weights and colours in the present price list are approximate. Any product can be modified or dismissed at any moment without notice. Little discrepancies may be found between the dimensions shown in the catalogue and the real pieces because of the manufacturing characteristics of the articles in ceramics.

PACKING

The packing of the goods is made per pallets and other form of packing involve a further charge.

CLAIMS

In case of manufacturing faults and defected goods the buyer has to claim to our firm by registered letter and within 8 days from reception of goods. Only the goods that will be found defected for faults of manufacture will be replaced by us. Any freights of any sort for the replacement of faulted goods are at buyer's charge.

CONTENTIOUS

For any dispute the competent jurisdiction is the court of Viterbo even when the contract has been drawn up elsewhere.

The prices of the present price list are meant ex factory and don't include V.A.T.

As a partial recovery of the packing cost, the 4% is charged with a minimum of 20,00 for orders up to 500,00. The composition of the pallets is underlined in the price list. Any variation of the standard composition will make a further charge of 3%.

These general conditions of sale are integrally approved by the buyer from the sending of the orders and collection of goods.

Certificazioni . Certifications

UNI EN ISO 9001: 2008 Certifies that all the phases of the production process are carried out following very strict procedures with periodical controls which allow maintaining quality standards constant in time.

UNI EN ISO 14001: 2004 Certifies reduction in environmental impact deriving from the various production process phases. Ceramica Globo re-uses the water needed for production at an almost continuous cycle and is always looking for technical solutions that improve the draining efficiency of the sanitary fixtures in order to reduce water consumption.

In 2010 Ceramica Globo obtained the CSA certificate from CSA International, in order to sell its product range in the United States and in Canada, countries where specific tests, particularly demanding, are requested.

WaterMark in 2009 Ceramica Globo received the WaterMark certificate from Sai Global to be able to sell its products on the Australian market, which has always been one of the most difficult due to the quality standard demanded.
