

# ROSLAGSKOMPOSTEN

Art.no 30010

Roslagskomposten is a hardy latrine compost with a secure cover that is suitable for the joint composting of household and latrine waste at second home properties. With the Roslagskomposten you get a latrine compost that meets the requirements of the municipalities and is also easy to work thanks to the large sliding lid.

#### Capacity:

For joint composting of household waste and latrine waste where there is year-round residence Roslagskomposten deals with waste for up to five people.

## EASY TO USE

### USE ONE AT A TIME

With two containers of 500 liters each one can handle a large volume as they are used alternately. This means filling one container to 3/4, then allowing it to compost while filling the other.

### SECURE LID

The lids design means does not let any rain or melted snow in, nor can it blow off. There is also no risk of letting in rats or mice.

### VENTILATED

The compost is ventilated on both sides.

### TIME FOR COMPOSTING

As latrine waste contains limited amounts of nutritional substances the composting time is longer, between 12-24 months, depending on the climate. Hence we recommend 2 containers with alternate filling/composting.

### SIMPLIFY THE HANDLING

In order to simplify and make the handling of the waste container more comfortable, you can use compostable bags. When composting you should first pour the contents of the bag and then put it in the compost. If you put the bag down with its contents in the bag or just hacking holes, it will take a lot longer time to compost the latrine waste than it normally would.

## INCLUDED WITH THE ROSLAGSKOMPOSTEN

- 1 x 500 l compost
- 1 lid

## SUPPLEMENT WITH

- 1175-01 Compost screw\*

\* With our compost screw, you easily oxygenate the compost.

## INSTALLATION

If you can choose between a shady and a sunny place to have the compost, you should choose the shady and the most secluded spot on the site possible.

We recommend having two containers and space to work with the composts. For example it would be good to have space for a wheelbarrow when you are emptying the compost.

Place the compost containers on a flat surface.

The Roslagskomposten can be dug down to a working height that you think is right for you.

## TECHNICAL DATA

ROSLAGSKOMPOSTEN	Material	Inner containers	Pack. size/weight
	Recyclable impact-resistant polyethylene. Cover galvanised plate	1*500 liter Full compost about 750 kg	L:98 B:93 H:84 cm 20 kg

**Warranty 3 year** The 3-year warranty includes all materials for original parts in the compost.

All our electrical products are ETL and/or CE marked. Further information about the products can be found on our website, [www.separett.com](http://www.separett.com)
