MATLINE | INTELLIGENT MAT SYSTEM | UK

"With MatLine, a classic is born.

Design and functionality combine to form a synthesis,
and the mat design becomes an integral part of the room

Kenneth Waaben, designer, Unidrain A/S

S | MATLINE LLIGENT MAT SYSTEM

Climate is a challenge, with snow, rain, mud and slush for much of the year. In family life, weather conditions often make it difficult to keep your home presentable. The unidrain® MatLine system is a highly functional and elegant solution to this everyday problem.

An intelligent mat system designed for people who appreciate elegance and efficiency. It is not only practical. It is also a design feature – one you will be proud to show off.

Install it in the utility room or in the hall and connect it to the existing drain system so that any water drains away. MatLine can be installed in any house type and floor design.

TECHNICAL DETAILS

MatLine is useful and relevant in every building. The intelligent mat system consists of four parts: A mat, frame, strainer and fitting. A hook is supplied to make raising the mat. The mat is flush with the surrounding floor and surrounded by a slim steel frame in stainless steel. There is a strainer under the mat to catch sand and gravel. Below that is the fitting, which is cast into the floor. Height-adjustable supports are available to order to facilitate the casting process.

- A: Mat
- B: Frame
- C: Strainer
- D: Fitting
- E: Height-adjustable supports (accessory)

To raise the mat, use the hook (supplied).
When the mat is raised, it locks automatically
into the raised position.

EASY TO CLEAN

MatLine helps to keep homes free of
The dirt falls into the gap between the

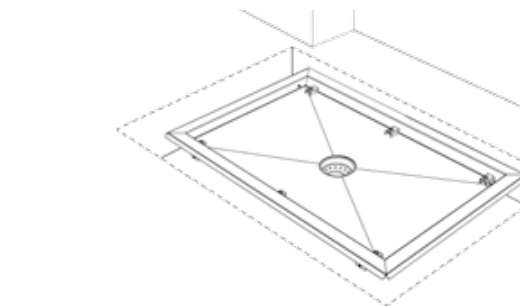

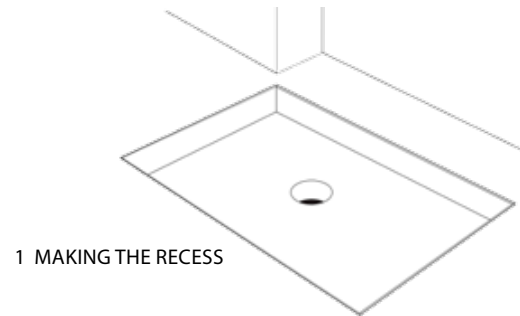

LINE ALL STRUCTURES

can be installed in any type of house or floor design including heavy concrete and light structures with timber beams. The mat efficiently removes dirt and mud, water. For all structures, the materials and building methods used must be suitable and approved.

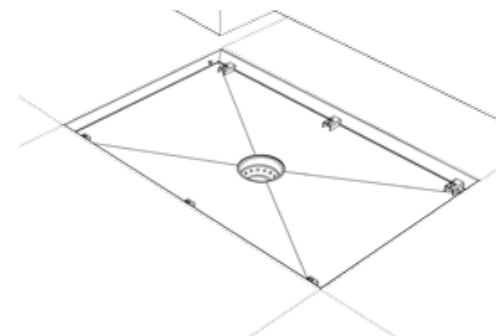

INSTALLATION

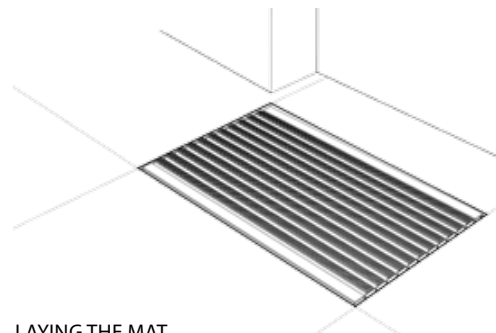

MatLine can be installed in any house type and floor design.

2 INSERTING THE FITTING AND CASTING

3 INSERTING THE FRAME AND LAYING TILES
